

How to *Avoid Losing* some Easy Extra Cash Every Day...

...Just by Copying and Pasting Ads on your
Twitter Profile

Declaration of Honesty

Hey there, I am not going to lie to you.

This method may make you money or it may not. Honestly, it made me some of my first money online for which I am grateful. (No, I am not a millionaire but I do make a nice living online)

It is not a complex method and I am encouraging you to give it a try. It won't cost you anything, if you prefer.

Basically the method breaks down as follows: You have a Twitter account that has followers. You 'tweet' ads, i.e. some text and a link, and then when one of your followers clicks your links, then you will earn a certain amount per click. The amount you receive depends on what the advertiser has agreed to pay you. This is called cash per click. [RevTwt](#) use this system.

Other advertiser platforms are cash per view. You have a certain amount of followers and the advertiser will pay you to tweet the advert. The amount that is paid depends directly on the **amount of followers** you have. You get paid regardless of whether you get clicks or not.

In general I believe the cash per click system is good for those who have experienced high click rates on their links in the past. The cash per view is good for those with a high follower number

I am gonna keep this book as short as possible. I mean, I don't need to have you reading a lengthy book to get all the important elements of this method across.

Bottom Line: The advertisers are paying for traffic; the websites take a small cut on every click; you (the publisher) are getting paid by tweeting some ads for the advertisers.

All the websites that I have mentioned pay on time and are easy to work. Thus, are the only ones I can honestly recommend.

Small print: This guide does contain some blatantly obvious referral getting shenanigans.

Required:

1. An active Twitter account i.e. you have followers.
2. A [RevTwt](#) account. Sign Up [here](#)
3. A [Sponsored Tweets](#) account. Sign Up [here](#)
4. An [Ad.ly](#) account which you can get by signing up [here](#).
5. Some basic computer and some internet savvy. (copying and pasting, opening your web browser etc.)
6. 5 mins every day!

Step 1

Log into [RevTwt](#). Click on the Post Ads tab located along the top of the user interface. Here you will be given a lot of choice in which ads you post.

Now, I would advise you to briefly go through them all and choose the ones you would think that your followers would be interested in, because it is only when your followers **click the ads** you get paid. You do not get paid for just posting the ads.... unfortunately!

Step 2

Log into [Sponsored Tweets](#). You will be asked to sign in via Twitter, so have your Twitter log in details at hand! [Sponsored Tweets](#) varies somewhat from [RevTwt](#). You still have to post ads onto your Twitter but this time you will be approached by an advertiser and you will be asked to post ads for them. They will sometimes ask you to rewrite the ad for them to your own liking using slang or whatever. It will then be approved and then you will copy and paste it to your Twitter profile!

Many internet marketing celebrities like '[ShoeMoney](#)' use [Sponsored Tweets](#)

Step 3

Log into your ad.ly account. Same drill as Sponsored Tweets here.

You will be asked to approve ads and then tweet them similar to [Sponsored Tweets](#) and [RevTwt](#). Sometimes you are asked to re-write them. Ad.ly has currently 70,000 active publishers. Some are big celebrities. So by being a publisher for ad.ly you get to work alongside these celebrities. Pretty cool, huh?

Step 4

You can be paid by either by check and/or PayPal. So you need a PayPal account. If you do not already have one then sign up for one by clicking [here](#).

Let me tell you a story...

Is there any worse feeling than losing money every day like there is a hole in your pocket? Well, come to think of it there are far worse feelings. 😊

But you have the power to use your Twitter time to make some extra legal tender, which will be tax free for the most part!

The websites that I have introduced you may not make you a millionaire anytime soon but they will surely make you anywhere from \$0.05 to \$10 bucks a day if you have an average sized twitter account(s). So the more money you want to earn, the more followers you ought to have.

I remember not so long ago, I told a friend about how to make some money with his twitter account. He was really impressed and had never even heard of making money online let alone with his twitter account. So he busted his ass getting more followers by manually following other people and then hoping that people followed him back. It worked ok-ish and he managed to get 1000's of followers although it took a long time! Now he has several accounts that have thousands of followers that he looks after quite providing all of his followers with good content, well basically he just browses the web and gives share links to funny videos and stuff. This went

on for months and he stumbled upon some [software](#) that follows people automatically.

It does all the work of getting followers for him. The software can even target specific twitter users based on their keywords they use in their tweets.

So he has been letting this software do all his work for him. He says it is like hiring an assistant and chaining him to the desk beside him. What's more he has already earned back the initial software price, which he told me wasn't that expensive... maybe the price of two cinema tickets and a couple of pizzas afterwards. He also said that there is a trial version that you can try out by clicking [here](#).

P.S.

If you are not interested in this guide or in using your Twitter to earn you some extra cash every day then you are missing out.

But, there are other ways of getting some cash without working very hard. This is a free bonus for trying out the trial version of the '[Twitter follower getter software](#)' that I mentioned above. Even if you don't want the software you can still get 100% access to my other book!

I will be taking it down soon so you better avail of it while it is up!
