

How to get a free 5 day vps

By Mildly Legit

Step 1.

Goto <https://lon-b.elastichosts.com/accounts/trial> and register with a REAL email and phone, they send you the first half of the password to email and the second in a text message to the phone.

Step 2.

Login with your email as your username and the 1st and second half of the password sent to you.

Step 3.

Click "Start"

Step 4.

Goto <http://www.tightvnc.com/> and download the client the matches your os.

Step 5.

This is the tricky part, once the installation is finished, open up TightVNC Viewer, and as the ip, enter the whole thing including (traffic).

Step 6.

Now type in the same password that you used to sign in.

Enjoy your free vps, you can re register as much times as you want, change emails the phone can be the same.

Don't abuse, there's only a certain amount of vps's online at one time.
