**Subject:** Need broadband internet access

As an IT professional, I really need high speed internet service. When I moved from Blairstown, MO to a home closer to Kansas City, it didn't dawn on me that I would lose the DSL access that I had enjoyed at my farm home in Blairstown. However, I am apparently just outside the boundary of the service provided by the internet provider in Garden City, MO (My address is Creighton but I am only 3 miles from Garden City). So my only option was to get a hot spot which gives me only 5 GB of data for \$50 which is about what I paid for my previous unlimited access DSL service. I must be very frugal with my data and am unable to use Netflix to stream videos as I used to do. As an IT professional, I telecommute every Monday so must save my data time for that purpose. I could really use access to DSL high speed internet service!
