

The Youporn Method (Part-1)

Ever since i released my ["ThesecretYoutubecashcowmethod"](#) i have been receiving PMs and emails about the Youporn Method to the extend that my inbox got filled.

For People who sign-up through my Loudmo Link i have the following Stuff Reserved only for you....So don't worry about me giving things for Free.

"BlackHat Player-If you are worried that people who download your videos will use other Players to watch it-Here is the solution"

"YouTube whoring"-I first thought of selling this for 49\$...But then,what the heck...Its going to be Free for those who signup under me for Loudmo account.

First Things first.To use the Youporn Method you will first need a Loudmo account.If use the link below to Signup for Loudmo you will be under my downline and I will personally mentor you by sharing my best earning methods with you.If you face any difficulties just email me at sgfordummies@gmail.com and I will be there to answer you.

[JoinLoudmoThroughthislinktogetMyOther Methods.](#)

I will keep updating my loudmo downline with many more methods that i personally use and Work.After all the only way i can see a few cents is by making you earn a few dollars...Right?

Before you learn about my 'Youporn method' pls hear a little incident about how i earned my first dollars in Internet.This is also the incident that changed my views and made me belive that i can actually earn with this method.

It was back in 2007.I had just tried my hands on adwords and i had lost some money in it.One day i downloaded a Ebook about Adwords from a Torrent.When i unzipped the Zip file there was a NotePad file and another password protected Zip file which came along with it.When i opened it and read it i realised that it was a salespage for some strange product.The sales page read something like this.....

Teen Girl Losing her Virginity right before the camera.

Have you ever seen a Girl losing her virginity LIVE?If you have been in the internet you would have seen Porn.Porn is for FREE.But there are some videos that are not for everybody.This video is a Premeium video that has been only viewed by some Rich and famous Previlaged members.This video is the only one of it's kind.

Emma is a sexy juicy girl in her late teen and a virgin.Seeing her attractive face and sexy body a company offered her 50,000 dollars if she would allow them to shoot her first sexual experience.She and her boyfriend were thinking over the offer for sometime and one fine day they showed up in the studio to get their first sexual experience Videotaped and the rest is history.

I saw this Premium video for 97\$ you can just see this same video by getting the password for Just 4\$.Just use the password to open the Zip file and witness a event only a few have ever seen.

After i read the sales page....i got interested and a bit Horny.I wanted to see that Premium video that can be seen by only a few previlaged members.I bought the Password for 4\$ opened the Zip file and saw the Video.I watched the video.It was a amature sex video and it was average.

A few weeks later i forgot all about the incident.While surfing i came across this site called "Youporn" for the first Time.while browsing across the site i saw the same Premium video that i payed 4\$ available for free in this site.

Something just clicked.For the first time i started to beleive that Porn can be Monetizedif it can be packaged well..

Wait.....I can feel that you are thinking like "So the Method is just about taking Porn videos from youporn and selling it....You call this a Method?"

My Answer is.....Yes basically it's all we are going to do..Monetizing Porn may be a old stuff...But my Method is in 'How we are going to do it.'

If you still beleive that Porn cannot be Monetized just close this ebook and leave.I respect your opinion and i will write other stuff that will get you interested later.

There are some methods that are not for everybody....To this day i beleive that i cannot earn a Cent from Twitter.That's just my belief and in reality there are people who are earning well with Twitter accounts.

If you are still reading....I promise you are going to earn good money if you follow my method...Because i have Tested them and it Works....I share only the Methods that work with you,Not some fancy methods that look good in Theory but never works.

Porn cannot be Monetized....Unless you have a method with a Twist in it.And yes our method has a Twist as well as a Turn in it.

Basics of the Youporn Method:-

1.Porn selection.

This is the First and the most important 'Make it or break it' step in our Youporn Method. Just go to the YouPorn.com website. There will be Millions of Porn videos there. Which one Are we going to select? All videos will have women showing their same Two boobs above and one stuff ...what they call Pussy...Below...But how some Porn companies are able to sell Their videos for 50\$ while millions of Porn videos showing the same Two boobs and one Pussy are available for Free?

The Answer is in Porn selection and Branding.

In my Two years of testing only the following Types of Porn Videos really work well to Convert.

1.Hidden camera sex.

(Give a Heading like "My Girlfriend caught having sex with my Brother-My revenge leaked video" and see how people are going to beg to see this video.)

2.Defloration-First orgasm-First sexual Experience.(You can use the sales page i gave as example above)

3.Porn videos that teach a lesson.(For example if you see a video of a Girl giving a Blow job you can just Brand the Video as "Girl teaching about How to give a Blowjob"

4.Models and Actress having sex and celebrity sex.

5.Scandals and Leaked Videos.

So...search youporn with words like....Hidden camera, defloration, virgin, oral sex, teach, model, actress, look alike, celebrity, scandals.

As soon as you find a Video look for the option 'Download as FLV' just below the video and click on the link and save the video to your computer.

Now you have a Product to earn money. Just view the Video once.....And answer the following Questions.

1. Is the Video made by amateurs or by any Porn Video company?

Select only videos made by amateurs. Amateurs make video to exhibit their sexuality to the whole world. so you are not going to get in to trouble if you are going to spread Amateur-Home made Videos. Further, Homemade Amateur Videos are generally liked more than the Professionally made videos.

Stay away from Professional Videos created by Porn companies, No matter how good they are. You may get in to serious Trouble with them if you use their videos. Don't say that i didn't warn you before.

2. Do you like the video? Do you want to see the video again?

Don't select the Video unless the Answer to the question is a astounding 'YES'.

3. What is unique about the video? What is attractive in the video, other than the 'Two boobs and one pussy below'?

Unless you have answer to this question don't select the video.

That's it. Now you have selected a video with which you are going to earn. It is enough if you can select only one video. Two at the most to Test different videos. Move to the next step as soon as possible.

Warning: Don't get addicted to watching porn. If you say to yourself i will get a Collection of videos first then i will move to the next step, then, that means you are getting addicted to Porn.

Get your Ass out of Porn and start working to earn some bucks. Don't fall in the same Trap you make.

2.Creating a Landing page for your Video:-

Create a landing page using Blogger or mysexylog.com(recommended).

The first thing you need is a Heading for your landing page.You have to get creative here.You should use/learn some Copywriting skills here....The Heading is like a bait in the hook to catch fishes.If your bait in the hook is not interesting for the Fishes then they won't bite.

Examples of some good Heading hooks:

Watch a Girl losing her Virginity right before the camera.
Learn how to give your Girlfriend good Head-Watch and Learn from the Experts.
etc....

After your Heading is ready just write couple of paragraphs that sell your video....

example below:

Teen Girl Losing her Virginity right before the camera.

Have you ever seen a Girl losing her virginity LIVE?If you have been in the internet you would have seen Porn.Porn is for FREE.But there are some videos that are not for everybody.This video is a Premium video that has been only viewed by some Rich and famous Privileged members.This video is the only one of it's kind.

Emma is a sexy juicy girl in her late teen and a virgin.Seeing her attractive face and sexy body a company offered her 50,000 dollars if she would allow them to shoot her first sexual experience.She and her boyfriend were thinking over the offer for sometime and one fine day they showed up in the studio to get their first sexual experience Videotaped and the rest is history.

I saw this Premium video for 97\$ you can just see this same video by

downloading the video for free

<Download Here>

(Note: You have to upload the zip file we are going to create in the next step so that when the visitor clicks on the "Download Here" option he gets his Video downloaded in the .FLV format)

3. Packaging your Video:

Create a Html/Notepad file with the following content and name it as 'Read_me_first.html'

The Video you have downloaded is in .FLV format. You will need a FLV player to play files with this extension. Pls install DirectFLV player from the following link. It's the best FLV player in market and it is free.....

[.....DownloadforFree.....](#)

(Note: Replace your FLV player link that you will get from Loudmo in the above link)

Now place the .flv video which you selected and downloaded from Youporn.com in the same folder where you placed the 'read me first' and zip the files.

Then upload it to a filesharing site that provides direct download links.

Use <http://www.snapdrive.net> or [mediafire](#)

4. How our method is going to work?:

Okay now we have the Landing page ready. People will get attracted by reading our Heading in the sales page. They will read the paragraphs which tempt them to download the file.

They will click on the download Here link and the download will start. On average the file size will be more than 30MB. So they will be waiting around 5 mins for the download to complete. As soon as they open the Zip file they will notice that they cannot play the .FLV file.

They have downloaded the file and yet they cannot watch the video. They will grow restless. They will look out for a solution to their problem. They will find the 'Read_me_first' file and they will download and install the FLV player. Bingo! You just earned 1.25\$ and your customer gets to see the video he desperately needed to watch.

Now I know you have two questions.

1. I can use \$harecash for this? This is an old method Why should I use Loudmo?

Of course you can use \$harecash type of sites to monetize this same method. But there is a big difference between my method with Loudmo and your method with \$hare cash.

Let's analyse with this scenario. Let's say I have two landing pages.... One landing page (say page1) monetized with the \$harecash download link and the other (page2) with Loudmo.

Let's say a Visitor A reads the Landing Page with sharecash download link (page1).... He really wants to see the Video and clicks on the Download link. \$harecash will ask him to fill up a Survey upfront to get the video. Now... the surveys are of more than one page and they will ask personal information like Address and Email. Most of the time the Visitor will make a decision not to fill the survey because he is too lazy to fill a survey. His horny midset is gone by the time he is asked to fill the surveys. If the user takes 15 mins of his time to fill out the survey then he should be really really desperate.

Let's assume the Visitor A has landed on the landing page monetized by Loudmo (page2). He clicks on the download link and the download starts. He waits with anticipation about what the video has in store for him. When he sees that he cannot play the .FLV file we are just providing a solution to his problem by providing him with a free FLV player. He happily installs the FLV player we earn the cash and he gets to see the video.

\$harecash blocks the user's goal of watching the video with a Survey while.... the Loudmo FLV player helps the user to reach his goal of

seeing the Video. So the conversion will be greater if you use Loudmo to monetize. Further you will get only .25\$ per conversion from \$harecash whereas you will get 1.25\$ per conversion from Loudmo.

If you already have this method running with \$harecash just test the same with Loudmo and see which one is converting more.

2. Your second question will be "Lot of people will have got a FLV player already installed. So there is less chance of them installing the FLV player we are going to recommend....Right?"

My Answer....The only people who know how to download and Play a .FLV files are 'Internet Marketers' and 'Programmers'. Around 80% of visitors don't have any idea about .FLV files or FLV players. So just do a small campaign and measure your conversions. You will see for yourself that I am Correct.

If you are still Troubled by the situation....I have got a BlackHat Fix for you.....If you do that correctly....users will not be able to play the video in their existing FLV-players and they will be forced to download our FLV player we recommend. If you have signed up for LoudMo under me send me a email to sqfordummies@gmail.com and I will share the method with you.

Finally how are we going to Bring Traffic to our Landing pages?

I have three ways of doing this.

Forum Signature:

Signup for some 10 Adult forums and have signature like "See a Virgin girl lose her virginity. Live before camera". When someone clicks on the link they should be taken to the landing page you have created.

Make around 20 posts in each forum daily with some random comments like "That's a good share" or "I have seen better videos than that" or "She looks smoking Hot" or Blah...blah...

If you do this for some 5 days you will start getting targeted traffic and you will be earning around 10 from the sixth day onwards.

You can also join some groups like yahoo groups and post your links there. You can also leave your links on Blog comments.

If you are member of Orkut or Myspace you can drop your link to your landing pages there also.

YoutubeTraffic:

In your youtube Video use the “youtube annotation” feature and Add some text like **“Teen Girl Losing her Virginity right before the camera—Watch here---->”** and in the description you can paste the URL to your landing page.

Also Try experimenting by giving the Download link Directly in the description. Sometimes this works better also.

"YouPorn Method-Part 2 -The unknown method to bring traffic from Porn sites to your Youtube Videos"

There is a way to bring views from Pornsites to your Youtube Videos. This is a method I found out after wasting weeks and months on different Porn sites.

Sorry...I can't share that Trick here. I am already seeing people using my ebook with their link on it and sharing it on different forums.

But I will find out a way to share this with the members of this forum only.

Look out for the **"YouPornMethod-Part2"**
