

This file should be obtained priceless. You don't have any resell rights.

This method is whitehat / greyhat. Depending on your choice. Everything is legal in explanation and I'm not responsible for anything that might happen.

What is whitehat : Let people download the real file(which is working)

Greyhat: Let people download A fake file.

This eBook is written by me based on other ebooks. I've changed the method so it worked for me, you are allowed to change it your way.

- Tachyon (Natez)

Introduction

What is sharecash?

Sharecash is a site which pays you when someone downloads your file. The paying rate is .40 - .80 USD per download depending on where you live.

If you don't have an account yet, register here: <http://adf.ly/7Gym>

The thing is: how do you get downloads.

Method

There are several methods which you can find in several eBooks.

In this eBook I will explain a method which involves Youtube.

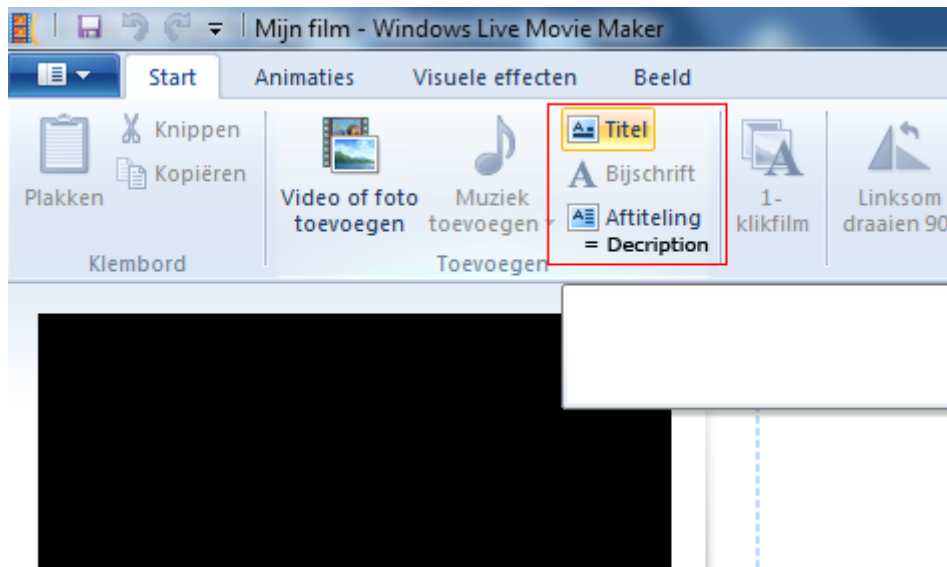

What do you have to do:

- Make an account on youtube
- Make an account on sharecash
- Use Windows (live) movie maker (you don't need any skills)

Open windows movie maker and try figuring it out. You should see a button with: 'add title' click on that.

You can now add text in your video. We don't need any images or something. Text is enough. You should add text which lures people (more info later)

Above add title you find 'add description' when you click that, you get a different scene in which you can add text. That way you can make a story.

What should be in the story?

I use a runescape giveaway story. This will get me like 60 page views a day, 1 dollar per working day and 5 dollars per weekend-day.

You can watch tutorials about movie maker, how to add effects etc to make it more professional. But a simple video works too.

This is a simple method which gets you around 10-15 dollars a week, or more if you add more effort.
