

Supported Employment (CWT/SE) Program

The Supported Employment Program (SE) assists veterans in pursuing competitive employment in the community. The program aims to bolster veterans' confidence and self-esteem by assisting with vocational assessments, job searches, interview skills and job development.

Veterans are provided with support services before and after job placement, referrals to VA and community supplementary services, and information on how work may impact benefits they are currently receiving.

The Supported Employment Program serves veterans with a variety of barriers to employment, including medical and/or mental health disorders, homelessness, and other obstacles. Veterans may be referred to the SE program through a number of VA programs, including HUD-VASH, HVRP, ACT and Grant Per Diem.

Eligibility

In addition to general CWT requirements, participants in the SE program must:

- Have a stated goal of finding competitive work
