This method will teach you how to make \$20-\$30 per day, it depends on how hard you work, you will make the money from Sharecash.org , and you can get millions of referrals, and

there are so many different ways you can  
make money with this

Sharecash.org , what's sharecash? Sharecash is a website where you can earn money, but without this method it takes so many days and sometimes months. Sharecash is simply a file upload site like Megaupload, Rapidshare and etc, but it actually pays you 20 – 60 cents per download, WAIT! Don't leave yet, it's not a scam, they earn more than that per each download, they use CPALEAD , so when a person wants to download something, they have to fill in a survey, and Sharecash makes lots of cash from CPALEAD, much more than we do. But Sharecash is the top paying site per download, it's a trusted site, lots and lots of people were paid by them, and still are getting paid.

The main problem people are having with Sharecash is they barely get any downloads, well this method will teach you how to get so many downloads, forever. This method can be used for many stuff, such as getting referrals (for Lockerz as well, I am a Z-Lister and this method did it all for me), and it can help you in getting your site more visits, and if there is a referral contest you have no worries, you can be the winner, this method does the magic.

Google, our top site will help us with this method.

As you see above, when you visit Google.com you will see “Search Settings” , click on “Search Settings”

You will find “Number of Results” the default is 10, change it to 100 since we will need it, it’s very useful.

Once you are done that, go back to Google.com and search [“site:site.com @gmail.com”](#), well we can make that let’s say [“site:twitter.com @gmail.com”](#), instead of Gmail you can use Yahoo, Hotmail, Aol and so many different ones (Don’t forget other extensions like co.uk ... and etc). But of course Twitter is the worst site you can use to get downloads, because most of the people there provide fake emails (they receive too much emails from Twitter), so try something like Digg.com and many social bookmark sites and etc, .

Now go to <http://www.surf7.net/services/value-added-services/free-web-tools/email-extractor-lite/>

(I highly recommend you this one, because it’s the best and adds a comma after each one automatically)

Go back to Google.com , then CTRL+A to select all, then CTRL+C to copy, and paste in the “input window” , and press “Extract” , then on the “output window” you will get all the emails separated by comma.

Now go to Sharecash.org, register there (if you are not registered) , then upload a video , a breakup video, and put the text “breakup” video ,you can download a breakup video from Youtube.com , you can use “<http://youtubedownloader.com>” to download Youtube videos. Once

uploaded, get the download URL, go to [www.bit.ly](http://www.bit.ly) or another URL shortener site, put the download link there so it shortens the URL for less suspiciousness. Now let's go to the other side... open your Gmail account (if you don't have one, create one), Why Gmail? Because Gmail allows to send up to 500 emails per time.

Put all the emails in the "CC" (Not "to" because they will see it was sent so many people).

And then make the "Subject" to  
"Re: Breakup"

Text:

"Samantha! How dare you break up with me through the net? Guess what! I am sending this video to your parents as well, I bet they didn't know you are so nasty like this!

[URL]

Your Ex BF!"

Of course you can change the text to something else.

But this method won't work if Google blocked your Internet Service Provider (ISP) if someone else has spammed with something... so you can maybe use another tool, or change your ISP.

This method can bring you all kinds of stuff, referrals, and money and etc, you can win so many referral contests, and bring lots of visitors to your site and etc. I have got 24 referrals in Lockerz from this method in a day (I am a Zlister, got a free t-shirt and have lots of points).

There are more ways than you can imagine using this method.

You have Resell rights to this Ebook! You may sell it, but you may not change the text or delete our “Sponsors” list, remember, this ebook was given to you free, please respect it. (You may delete this text when selling this ebook (that I gave it to you)).
