

HOW I MADE OVER \$250.00 A DAY PLAYING ONLINE ROULETTE

Congratulation and thank you for purchasing this ebook you are one step closer to earning over \$250.00 a day. The system you are about to learn will make you an advantage player as they are called in the Casino world.

The system I am about to show you has been years in the making, I have personally used it to make thousands from many online casinos I will show you step by step how I became an advantage player winning and making a steady predictable income hourly and daily online while playing online roulette.

We have studied and tested many casinos over the years and applied and refined this technique which has become a system We now use it to make a lot of money from the casinos.

The good news is that you won't need to take any risk with any of your own money trying this system so you are guaranteed to be a winner. Most of the casinos offer bonus to new players which you will use. I will show you which Casinos are well established, offer the best bonus and also which ones are the fairest.

You have taken the all important step and bought this system, now before I show you how the system works it is **very important that you read through all of this material** so you will understand clearly how the system works and take full advantage of it.

Most people including professional gamblers know that **in order to earn you have to learn**. So please be patient and be prepared to read all the material so your goal of making \$250.00 a day will be realised. The professional gambler is a very disciplined, patient and emotionally controlled person. Please keep this in mind as we proceed.

Step 1 – Downloading the Casino Software

Firstly we tried and tested numerous Casinos and found that the system works best on [this site](#) (and others found at the end of the course)

To [Download this free Casino software : Click Here](#)

These are some of the largest and most reputable casinos on the net with over 3.5 millions players daily and growing. They are global companies, highly rated as some of the biggest, fairest and most respectable online casinos out there.

Step 2 - Signing Up and Getting Your Bonus

Now you have downloaded the software it's time to register your account and get you free money to kick start the system. **Please note** : the bonus is a onetime payment for first time players so in order to make the most of it you should deposit the max \$200.00 in most cases this will allow them to match your deposit with the maximum \$500.00 bonus offer.

Remember your deposit is never at risk as you can cash out any time and also never bet using your deposit (there is no need). This money is called sitting money by the pros and they are all aware that casino accounts with sitting money are looked upon favourably by the system.

After a few days of playing you will win enough money and be able to withdraw more than your original deposit leaving some sitting money. For the best result you should leave some sitting money in your account. That way your account will not be viewed with any suspicion but favourably instead.

Now you have registered its time to start the program and make your refundable deposit.

Lets Get down to Making Money Now!

Step 3 – The Basics of the system

How this system work is that you lay bets on the same section for every spin until your number for the section drops in. By increasing your bet slightly each time, whenever your number drops in you win.

This may sound risky but when you understand the way the roulette program is designed you will realize its not. The bets and odds are calculated for each spin to make sure you win. Also you will be risking the bonus for this so there is no risk to your own money which you can cash out anytime.

The big factor working in your favour is a programming glitch in the design of the casino program that lets it rarely picks number from the same section of the table for too many times in a row. The program developers were trying to make the program seem more random, but by doing this the programmers virtually allow this flaw that you the observant on looker will exploit.

This inherent flaw can be exploited in most casinos since most of the millions of people playing on the casinos aren't aware of it nor discipline enough to use it. The reason is they are not professionals neither are they aware that in order to make real money you must follow some kind of system consistently (after all Mcdonald restaurant around the world is a system)

Based on the law of average there is a 1 in 3 chance of winning (that is your section of the table coming up). So for every \$1 you bet you will win \$3 (a profit of \$2 for every \$1 bet placed)

Lets look a bit closer at the Roulette table its divided up in 3 sections.

The 1st (or lower) section is numbered from 1 to 12,

The 2nd (or middle) section goes from 13-24

The 3rd (or upper) section is numbered 25 to 36.

Armed with patience and discipline lets say we are at a table then make a few spins and the following numbers comes up

2,24,8,31,17,5,34,28,10

we would write down :

1,2,1,3,2,1,3,3,1

What we will do is wait for 5 consecutive spins of the wheel where one of the numbers from one section of the table has not come up.

As soon as this happens its place bet number 1.If the number doesn't come up the first time(after placing \$1 bet) just ignore and keep to the plan listed below(place next bet \$2 etc until then number comes up.Dont let nerves get to you remember its their money you are using anyway.

Always Remember, Patience and Precision is key I am outlining the amounts and the times of each bet.This list must be followed precisely for you to be successful.You should write these amounts down for each bets and keep beside you when you are placing bets.

Lets say we are at table 200 and the following number comes up :

23,28,1,15,22,8,11

you should write the sections as follows :

2,3,1,2,2,1,1

place a \$1 bet on section 3 and follow the list until the number comes up and you win So if your stake (bet) was \$1 your winning will be \$3 for a profit of \$2 (3-1).

It is really that simple! But it works like magic!

Here is the staking list I use and recommend keep using this plan and you profit will add up pretty soon :

Bet Number (order)	Amount to Bet	Winnings
1	\$1	\$3
2	\$2	\$6
3	\$3	\$9
4	\$4	\$12
5	\$6	\$18
6	\$9	\$27
7	\$13	\$39
8	\$20	\$60
9	\$30	\$90
10	\$45	\$135
11	\$67	\$201

Finally Step 4 - Lets Start Real Play

Go to the start menu and click the Casino icon for the online casino you downloaded (this icon may also appear on your desktop as well)

Sign in using your sign in name

Follow the Roulette Link

Always take the Private Room option if there is one as you will be able to spin the wheel at will without betting for each spin.

If there is no private room place a small \$1 bet on odd and even(or black and red) at same time (either one or the other outcome has almost 100% chance of coming each time so your loss is little to none). This is necessary for you to be able to spin the roulette wheel. Each turn.

Now get your list ready and start earning.

Success Tips

My experience is that the casino program plays hardest between the hours of 2am and 3am local time all days also on Friday 5-8pm local time so avoid playing these hours for the system to be most effective.

Don't spend more than 10-15 minutes at each table.

Don't logon for more than 30-45minutes

Set a target of say \$30.00 per half an hour and log out after you have achieve this target .I don't normally go beyond 30mins mark .If you make \$30.00 before 30mins take the money and go .Remember don't be greedy.

Don't log back in for another 45minutes to an hour.

Remember, be disciplined and follow the system don't get too greedy and don't bet with your sitting money.

Best of Luck!

I am off to make my \$250.00

After experiencing many online casinos I have used the following online casinos for this system. They have passed the test for honesty, reliability and good customer service.
