FACES

Cigman, DPZone, Felipe Pflanze, illuminaty

AFS Explorer by WE-NG Team

HOW TO INSTALL

1. Copy the content of the save folder to 'My documents/KONAMI/Pro Evolution Soccer 2011/save'
2. Copy the exe file to your PES 2011 directory. (there are 2 exes, one for the original 1.0.0 version of the game and one for the new 1.0.1 update.)
3. Insert the bin files from the dt0c.img, dt02.img, dt04.img dt07.img and dt09.img folders to the respective img files using the little tutorial below.
4. Start the game with pes2011.exe

The 1.0.1 update for PES 2011 (required for online mode) can be downloaded here:

<http://dl.pes2011.konamionline.com/pes2011/patch/1.01/bbe09cd64022e657f7ec9481bb4d5bfa/PES2011Patch101.zip>

HOW TO IMPORT BIN FILES INTO IMG FILES

The following explains how to install the files into dt02.img, for the other files (dt0c.img, dt04.img dt07.img and dt09.img) it's the same, just the names differ.

1. Open dt02.img (PES 2011/img) with AFS Explorer 3.7
2. Click 'Action → Import Folder' and select the folder dt02.img in this download, then click 'ok'.
3. In the next window it will ask you to rebuild, click yes and save a file 'dt02.img' to anywhere (e.g. your desktop)
4. Once it's finished, copy the newly created dt02.img (placed in the directory which you decided to use for the rebuild) and copy it to PES 2011/img folder, replace the existing file.

*If anything went wrong you can copy the original img files from the game disc (program files/KONAMI/Pro Evolution Soccer 2011/img)

HOW TO DISMISS CERTAIN PARTS OF THE PATCH

If you don't want the new music for example, don't install the img folder where it's stored and don't copy the exe (new song names)

Here's a little overview about this:

- Schüco Arena Training stadium → dt07.img
- Music → dt02.img, pes2011.exe
- Created stadiums → ST_EXPORT01.bin, ST_EXPORT02.bin, ST_THUMB01.bin, ST_THUMB02.bin
- Referee kits → dt09.img
