Definitions

1) Underlying items are adjusted for unrealised changes in value for energy contracts and significant non-recurring items. This is adjusted up to and including the

operating profit.

² EBITDA margin, underlying (%): (Operating result before depreciation and amortisation x 100)/Gross operating revenues.

³ ROACE, underlying (%): (Underlying operating result x 100)/Average capital employed (revolving 12 months)

⁴ Capital employed: Tangible fixed assets + Intangible assets + Non-interest-bearing receivables + Inventories - Payable tax - Other short-term and long-term interest-free debt + Group contribution allocated, not paid.

SOLID RESULT AND STRENGTHENED INTERNATIONAL POSITION

Statkraft posted a solid result in a market characterised by moderate power prices.

Our position within renewable energy has been strengthened through the acquisition of hydropower in Brazil and Chile, as well as rights for developing offshore wind in the UK.

The result from underlying operations (EBITDA) ended at NOK 3.5 billion. This is deemed to be solid, although the underlying EBITDA was NOK 289 million lower than in the same quarter in 2014, primarily as a result of lower contributions from the Nordic power trading.

The first quarter of 2015 had an average Nordic energy price of 28.2 EUR/MWh, which was 7 per cent lower than in the same quarter of last year. The Group's power production was 15.7 TWh, a 2 per cent increase.

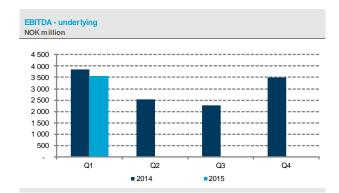

Currency effects in the financial items as a result of a stronger NOK against EUR had a positive impact on the quarterly profit. The net profit was NOK 3.7 billion, an improvement of NOK 0.9 billion compared with the first quarter of 2014. The currency effects are offset by translation effects in equity.

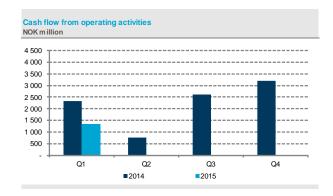

Statkraft has entered into an agreement to purchase 98.2 per cent of the listed hydropower company

Empresa Eléctrica Pilmaiquén S.A. in Chile. Statkraft has also entered into an agreement to purchase Jackson Empreendimentos S.A.'s shares in the Brazilian power company Desenvix. The agreement is awaiting approval from the Brazilian authorities. The ownership interest will increase to 81.3 per cent when the transaction is implemented.

There is still a high level of activity within wind power and Statkraft has purchased half of the rights to the offshore wind power project Triton Knoll (up to 900 MW) off the coast of the UK from RWE Innogy. The two companies will develop the project up to the planned investment decision in 2017.

Along with Södra Cell, Statkraft has established a company that aims to produce biofuels. The company is called Silva Green Fuel and 51 per cent is owned by Statkraft and 49 per cent by Södra Cell.

Corporate social responsibility and HSE

	First	quarter	Year
	2015	2014	2014
Corporate reponsibility and HSE			
Fatalities 1)	0	0	4
TRI rate Statkraft 1) 2)	4.7	5.2	5.5
Serious environmental incidents	0	0	0
Full-time equivalents, Group	3 390	3 546	3 348
Absence due to illness, Group (%)	3.6	3.3	2.8

¹⁾ Includes employees and suppliers in plants where Statkraft owns 20% or more. Third parties (not employees or contractors) are not included.

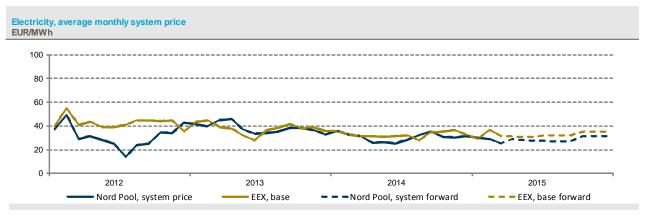

Two incidents with serious injury were registered in this quarter.

- → The Group's TRI injury frequency was 4.7 in the first quarter, which represents a decline compared with the same period in 2014.
- → There were no serious environmental incidents during this quarter.
- Absence due to illness was somewhat higher than in the first quarter of 2014, but has stabilised at a satisfactory level.

Market and production

Power prices, power optimisation and production form the fundamental basis for Statkraft's revenues. The majority of Statkraft's output is generated in the Nordic region. Power prices are influenced by hydrological factors and commodity prices for thermal power generation. Gas is only an input factor in a limited percentage of Statkraft's own power generation.

POWER PRICES

Sources: Nord Pool and the European Energy Exchange (EEX)

The average system price in the Nordic region was 28.2 EUR/MWh in the quarter, a decline of 7% compared with the same period in 2014. The decline was primarily driven by higher-than-normal temperatures as well as higher-than-normal inflow. Forward prices in the Nordic region fell throughout the quarter, partly due to higher-than-normal inflow, as well as declining coal prices.

The average spot price in the German market was 32.2 EUR/MWh in the quarter, a decline of 4% compared with the same period in 2014. Dropping commodity prices and somewhat increased capacity within renewable energy contributed to the decline. Forward prices in Germany fell somewhat during the quarter.

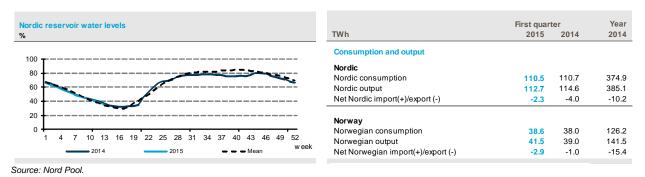

The average system price in the UK was 55.1 EUR/MWh in the quarter, an increase of 1% compared with the same period in 2014. Falling commodity prices had a certain impact, but this was offset by a weaker EUR against the GBP. Forward prices in GBP fell throughout the quarter, but rose in EUR.

²⁾ TRI rate: Number of injuries per million hours worked

	Fire	First quarter

Average gas price, EGT	21.2	24.6	-3.4	21.1	

Sources: Nord Pool, European Energy Exchange (EEX) and Eon Gas Trading (EGT).

CONSUMPTION AND RESOURCE ACCESS IN THE NORDIC REGION

The inflow was higher than normal in the period. Total reservoir level in the Nordic region was 102% of normal level. The reservoirs were filled to 35% of capacity (37% in 2014), with a maximum reservoir capacity of 121.4 TWh at the end of the quarter.

In the first quarter, a net 2.3 TWh was exported from the Nordic region, compared with net exports of 4.0 TWh in the corresponding period in 2014.

STATKRAFT'S POWER PRODUCTION

Statkraft's production is determined by water reservoir capacity and reservoir water levels, access to resources (inflow and wind), the margin between power and gas prices (spark spread) and power optimisation.

TWh	First quart 2015	er 2014	Year 2014	TWh	First quart 2015	er 2014	Year 2014
Production, technology				Production, geography			
Hydropower	14.9	14.7	53.4	Norway	12.9	12.4	46.4
Wind power	0.6	0.5	1.7	Nordic ex. Norway	1.9	1.7	5.6
Gas power	0.1	0.1	0.5	Europe ex. Nordic	0.3	0.6	1.8
Bio power	0.1	0.1	0.3	Rest of the world	0.6	0.7	2.2
Total production	15.7	15.4	56.0	Total production	15.7	15.4	56.0

The Group produced a total of 15.7 TWh in the first quarter, an increase of 2% compared with the same period in 2014. In addition, the Group's district heating production amounted to 0.4 TWh.

Financial performance

The quarterly report shows the development in the first quarter of 2015 compared with the first quarter of 2014, unless otherwise stated. Figures in parentheses show the comparable figures for the corresponding period in 2014.

	First quarter				
NOK million	2015		Change	2014	
Key figures					
Net operating revenues, underlying	5 539	5 954	-415	20 602	
EBITDA, underlying	3 547	3 836	-289	12 132	
Profit before tax	5 676	4 326	1 350	7 937	
Net profit	3 683	2 800	882	3 892	

The Group had considerable positive currency effects in the first quarter of 2015 and this helped ensure that the Group's profit after tax was about NOK 0.9 billion higher than in the first quarter of 2014.

GROSS OPERATING PROFIT (EBITDA) – UNDERLYING

The underlying EBITDA was NOK 289 million lower than in the same quarter in 2014, primarily as a result of a lower Nordic power prices, as well as deconsolidation of wind farms in the UK. The decline was partly offset by higher Norwegian hydropower generation, improved profit from trading and origination, new wind power capacity in Sweden as well as currency effects.

OPERATING REVENUES - UNDERLYING

	_				
	First quarter			Year	
NOK million	2015	2014	Change	2014	
Net operating revenues, underlying					
Net physical spot sales, incl. green certificates	9 445	9 484	-38	31 133	
Concessionary sales at statutory prices	106	102	4	349	
Long-term contracts	1 878	2 082	-205	8 294	
Nordic and Continental Dynamic Asset Management Portfolio	214	633	-419	971	
Trading and origination (excl. market access Germany and UK - renewable)	212	141	71	818	
Distribution grid	306	309	-3	966	
End user	1 335	1 322	12	3 988	
District heating, energy sales	246	229	17	643	
Other sales revenues	-106	12	-119	-11	
Currency hedging energy contracts	-40	-15	-24	-46	
Sales revenues	13 595	14 299	-704	47 107	
Other operating revenues	200	283	-83	1 241	
Gross operating revenues	13 795	14 582	-787	48 348	
Energy purchase	-7 947	-8 321	374	-26 561	
Transmission costs	-309	-307	-2	-1 185	
Net operating revenues	5 539	5 954	-415	20 602	

- → Revenues from long-term contracts were lower than in the corresponding quarter in 2014 as a result of lower volumes on contracts in Brazil. This reduction in volume also contributes to a reduction in energy purchases.
- → The changes in the Nordic dynamic asset management portfolio and trading and origination relate to exposure to and changes in market prices.

OPERATING EXPENSES - UNDERLYING

	First quarter				
NOK million	2015	2014	Change	2014	
Operating expenses, underlying					
Salaries and payroll costs	-853	-868	15	-3 332	
Depreciation	-754	-740	-14	-3 021	
Property tax and licence fees	-416	-420	4	-1 645	
Other operating expenses	-723	-829	107	-3 494	
Operating expenses	-2 746	-2 858	112	-11 492	

→ Other operating expenses were somewhat lower than in the same quarter in 2014. This is among other things related to a positive effect from the final settlement from the water regulating authorities in Sweden, in addition to

somewhat lower expensing linked to projects in the Nordic region. There was also a positive effect associated with deconsolidation of UK wind farms over the course of 2014.

ITEMS EXCLUDED FROM THE UNDERLYING OPERATING RESULT

Unrealised changes in value on energy contracts and significant non-recurring items have been excluded from the underlying operating profit. The unrealised changes in value are partly due to the Group's energy contracts being indexed against various commodities, currencies and other indexes.

	First	Year		
NOK million	2015	2014	Change	2014
Items excluded from the underlying operating profit Unrealised changes in value of energy contracts	-518	-47	-471	2 396
Significant non-recurring items Lawsuit Saurdal concessionary power Pension - scheme change Gain from sale of assets Impairment of property, plant and equipment and intangible assets	- - - -	56 56 - -	-56 -56 - - -	2 053 56 280 2 767 -1 050

- → There was a negative development on long-term power sales agreements denominated in EUR due to a stronger NOK against EUR. There was also a negative development on contracts linked to the Nordic dynamic asset management portfolio due to realisation of gains in the first quarter.
- There were no significant non-recurring items in the first quarter.

SHARE OF PROFIT FROM ASSOCIATED COMPANIES AND JOINT VENTURES

The Group has major shareholdings in the regional Norwegian power companies BKK and Agder Energi, as well as shareholdings in companies outside Norway, where much of the activity takes place through participation in partly-owned companies.

	First quarter				
NOK million	2015	2014	Change	2014	
Share of profit from associated companies and joint ventures					
International Hydropower	6	28	-22	-240	
Windpower	65	-	65	363	
Industrial Ownership	342	536	-193	535	
Others	-	-	-	3	
Associated companies	413	563	-150	661	

- → The decline for International Hydropower was mainly due to negative currency effects as well as non-recurring effects that were incorporated into the first quarter of 2014.
- → The improvements for Wind Power were due to fact that UK wind farms are included as a joint venture.
- The decline for Industrial Ownership is due to positive non-recurring effects included in the first quarter of 2014, as well as lower power prices.

FINANCIAL ITEMS

	First quarter			
NOK million	2015	2014	Change	2014
Financial items				
Interestincome	98	56	42	267
Other financial income	7	3	4	592
Gross financial income	105	60	46	859
Interest expenses	-249	-311	62	-1 226
Other financial expenses	-179	-23	-156	-83
Gross financial expenses	-427	-334	-94	-1 309
Currency gains and losses	3 480	1 043	2 437	-4 791
Other financial items	-170	-112	-58	-1 043
Net financial items	2 987	657	2 330	-6 283

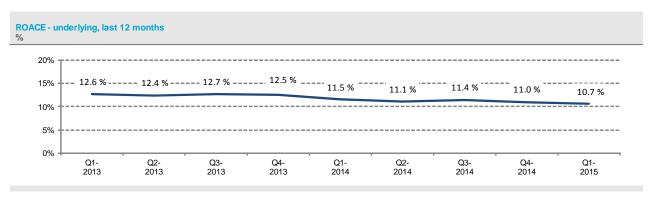

- Financial income increased by NOK 46 million as a result of both increased liquidity and lending to associated companies.
- Financial expenses increased by NOK 94 million, which was mainly due to recognising capitalised borrowing costs in the income statement in connection with refinancing in Peru.

- → Net currency effects in the first quarter amounted to NOK 3480 million, mainly as a result of a stronger NOK against EUR. These were mainly unrealised and are fully offset by positive translation effects in the equity.
- → Other financial items increased by NOK 58 million, and include losses on interest-rate derivatives.

TAXES

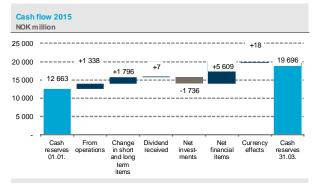

The recorded tax expense was NOK 1993 million in the first quarter (NOK 1525 million). The increase in tax expense is mainly due to a higher profit before tax.

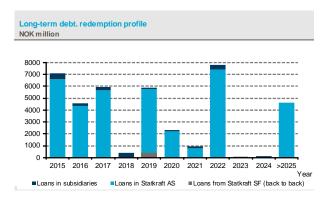

RETURN

Measured as ROACE¹, return amounted to 0.3 percentage points below that of 2014. This decline was caused by a lower operating profit.

CASH FLOW AND CAPITAL STRUCTURE

Cash flow

- → The Group's operations generated a cash flow of NOK 1338 million (NOK 2335 million).
- → The changes in short and long-term items had a positive effect of NOK 1796 million (NOK +924 million). The change was mainly related to working capital and cash collateral.
- → Net investments² amounted to NOK -1736 million (NOK -1842 million). This was primarily investments in property, plant and equipment totalling NOK -1715 million.
- → The net liquidity change from financing amounted to NOK 5609 million (NOK 403 million). New debt totalled NOK 7604 million (NOK 465 million), while repayment of debt amounted to NOK 1976 million (NOK 3395 million).

Financial structure

At the end of the quarter, Statkraft had the following financial structure:

- → Net interest-bearing debt³ totalled NOK 22 279 million, compared with NOK 23 638 million at the beginning of the year. This decline is related to higher bank deposits.
- → The net interest-bearing debt-equity ratio was 19.9%, compared with 21.2% at year-end 2014.
- → Current assets, except cash and cash equivalents, amounted to NOK 21 871 million.

¹ ROACE (%): (Operating profit adjusted for unrealised changes in the value of energy contracts and significant non-recurring items x 100) / average capital employed.

² Net investments include investments paid at the end of the quarter, payments received from sale of non-current assets, net liquidity out from the Group upon acquisition of activities and repayment and disbursement of loans.

³ Net interest-bearing debt: Gross interest-bearing liabilities – bank deposits, cash in hand and similar excluding restricted funds – short-term financial investments

- → Short-term interest-free debt was NOK 22 453 million.
- → Statkraft's equity totalled NOK 89 494 million, compared with NOK 88 059 million at the start of the year. This corresponds to 50.7% of total assets. The increase in equity was linked to a positive total comprehensive income of NOK 1453 million.

INVESTMENTS AND PROJECTS

Total investments in the quarter amounted to NOK 2490 million. Maintenance investments and other investments were primarily related to Nordic hydropower. Investments in new capacity were mainly linked to hydropower developments in Turkey and Albania, as well as wind power developments in Sweden and the UK. The investments in ownership interests were primarily related to the purchase of shares in Triton Knoll and Södra Cell Tofte, as well as the establishment of Silva Green Fuel.

Segments

The segment structure follows the internal management information that is systematically reviewed by corporate management and used for resource allocation and assessment of goal attainment. The segments are Nordic hydropower, Continental energy and trading, International hydropower, Wind power, District heating and Industrial ownership. Areas not shown as separate segments are presented under the heading Other activities.

Investments in new capacity	138	64	439
Investments in shareholdings	2	-	-
Production, volume sold (TWh)	12.4	12.0	44.9

Highlights in the quarter

→ In March, the governments of Norway and Sweden came to agreement on additional electricity certificates. The joint goal for the electricity certificate market in 2020 is increased by 2 TWh, from 26.4 TWh to 28.4 TWh. The increase involves no changes to the Norwegian financing commitment of 13.2 TWh. The new agreement must be approved by the parliaments of both countries.

Quarterly financial performance

→ Underlying EBITDA was higher than in the first quarter of 2014, mainly due to the fact that higher production and positive currency effects more than offset the effect of lower Nordic power prices. Operating costs were somewhat lower.

Quarterly investments

Investments in increased capacity were mainly related to the Nedre Røssåga power plant.

CONTINENTAL ENERGY AND TRADING

NOK million	First 2015	quarter 2014	Year 2014

Investments in shareholdings	-	-	-
Production, volume sold (TWh)	0.3	0.3	1.1

The comparative figures for the first quarter of 2014 have been reworked with reclassification of trading and origination activities from the International hydropower segment following the restructuring of SN Power.

Quarterly financial performance

Underlying EBITDA was lower than in the first quarter of 2014, mainly due to lower results from the Nordic dynamic asset management portfolio. Operating expenses were on a par with the first quarter of 2014.

INTERNATIONAL HYDROPOWER

	First	quarter	Year

Investments in new capacity	456	774	3 073
Investments in shareholdings	-	3	1 126
Production, volume sold (TWh)	0.6	0.7	2.2

The comparative figures for 2014 have been reworked with reclassification of trading and origination activities from the Continental energy and trading segment following the restructuring of SN Power.

Highlights in the quarter

- → Statkraft entered into an agreement with Jackson to take over its shareholding in Desenvix in Brazil, where Statkraft's shareholding will increase to 81.3%. The final agreement was signed in April and the transaction is expected to be completed by the third quarter.
- → In April, Statkraft entered into an agreement to purchase 98.2% of the listed hydropower company Empresa Eléctrica Pilmaiquén S.A. in Chile

Quarterly financial performance

- → The increase in underlying EBITDA compared with the first quarter of 2014 was related to lower holding costs as a result of the restructuring of SN Power, enlarged by currency effects.
- → The decline in share of profit from associated companies and joint ventures was mainly due to non-recurring effects in the first quarter of 2014, as well as the restructuring of SN Power.

Quarterly investments

Investments in new capacity were related to the hydropower developments in Turkey, Albania and Peru.

WIND POWER

Highlights in the quarter

Statkraft purchased half of the offshore wind power project Triton Knoll (up to 900 MW) off the coast of the UK from RWE Innogy. The two companies will develop the project up to the investment decision in 2017.

Quarterly financial performance

- The decline in underlying EBITDA was primarily caused by the deconsolidation of the wind farms in the UK, somewhat offset by new production capacity in Sweden and higher production from Norwegian wind farms.
- The share of profit from associated companies and joint ventures increased as a result of Statkraft's shareholding in the three UK wind farms presented in this item.

Quarterly investments

→ The investments were mainly related to the onshore wind farms that are under construction, as well as the Dudgeon offshore wind farm outside the UK.

DISTRICT HEATING

other investments	2	-	7
Investments in new capacity	70	77	309
Investments in shareholdings	-	-	-
Production, volume sold (TWh)	0.4	0.3	0.9

Highlights in the quarter

- The new district heating plant in Sandefjord was officially opened.
- → A new gas boiler (16 MW) started operation in Harstad.

Quarterly financial performance

→ The improvement in EBITDA was linked to higher generation, good availability, lower fuel prices and increased waste management.

Quarterly investments

→ The investments were primarily related to construction of district heating plants in Moss/Rygge, as well as the development of the district heating grid in existing activities.

INDUSTRIAL OWNERSHIP¹⁾

	Fret mon		Year

Investments in new capacity	60	100	354
Investments in shareholdings	-	1	2
Production, volume sold (TWh)	1.7	1.8	5.7

¹⁾ Industrial ownership includes the shareholdings in Skagerak Energi, Fjordkraft, BKK, Agder Energi and Istad. The two former companies are included in the consolidated financial statements, while the other three companies are reported as associated companies

Highlights in the quarter

→ Both Agder Energi and BKK were hit by the storm Nina in early January, and 60 000 customers in BKK's supply area lost power. Total costs are estimated at about NOK 100 million for BKK.

Quarterly financial performance

- → The increase in EBITDA compared with same period in 2014 is mainly due to higher contributions from the end-user business.
- The decline in share of profit from associated companies was mainly due to gains from the sale of subsidiaries in Istad in the first quarter of 2014. BKK and Agder Energi have somewhat lower results due to the storm Nina, and Agder Energi has lower income from power generation.

Quarterly investments

 The largest investments were related to new investments in grid activities. ______

OTHER ACTIVITIES¹⁾

	First	quarter	Year
NOK million	2015	2014	2014

Investments in shareholdings	246	-1	-
Production, volume sold (TWh)	0.1	0.0	0.3

 $^{^{\}rm 1)}$ The Other activities segment includes small-scale hydropower, innovation and group functions.

Highlights in the quarter

→ Statkraft purchased 100% of the shares in Södra Cell Tofte AS. Statkraft established the biofuel company Silva Green Fuel AS in cooperation with Södra Skogägarna Ekonomisk Förening (Swedish forest owner association).

Quarterly financial performance

→ The reduced EBITDA in the first quarter is related to a generally higher activity level in Group functions, as well as negative currency effects from energy contracts.

Quarterly investments

- Investments in shareholdings are linked to investments in Södra Cell Tofte AS and Silva Green Fuel AS.
- → Maintenance and other investments were primarily associated with administration buildings and IT, while investments in increased capacity were mainly related to investments in small-scale hydropower.

Outlook

The Nordic forward power prices are at a moderate level. Statkraft's large reservoir capacity with seasonal and multipleyear reservoirs provides the Group with substantial flexibility to manage water resources efficiently. A significant share of the Group's power generation is sold through long-term power contracts, which helps stabilise the Group's revenues. New production capacity under construction will result in increased income going forward. Market activities are expected to make a positive contribution, but at a lower level than in 2014.

The Group makes considerable investments in order to rehabilitate its older hydropower plants in Norway and Sweden. The fast-growing share of renewable energy in the EU is leading to considerable changes in the European power system and has contributed to lower power prices in Europe. At the same time, the energy conversion poses investment opportunities within renewable energy. Statkraft is developing a number of new projects within hydropower, wind power and district heating, and also maintains a high level of activity within energy trading.

Outside Europe, population growth and economic growth are leading to a rising demand for energy. Based on Statkraft's core expertise, this provides vast opportunities for value creation within renewable energy. The acquisitions in South America and completion of new hydropower plants in 2015 will strengthen Statkraft's international position within hydropower.

Oslo, 29 April 2015 The Board of Directors of Statkraft AS

Maintenance investments and other investments*	2 368	1 673	85	65	1	7	470	67	-
Investments in new generating capacity	7 525	439	17	3 073	3 197	309	354	137	-
Investments in other companies	1 287	-	-	1 126	159	-	2	-	-

Comparative figures are restated as a consequence of transferring the trading and origination activities from the segment International hydropower to Continental energy & trading through the SN power restructuring.

^{*}Maintanance investments and other investments includes the additon of Leirdøla power plant of NOK 506 million. The additon is classified under other investments, as it is part of an asset swap that does not generate new capacity for the group.

Selected notes to the accounts

1. FRAMEWORK AND MATERIAL ACCOUNTING POLICIES

The consolidated financial statement for the first quarter of 2015, closed on 31 March 2015, have been prepared in accordance with the accounting principles in International Financial Reporting Standards (IFRS) and consist of Statkraft AS and its subsidiaries and associates. The interim financial statements have been prepared in accordance with IAS 34, Interim Financial Reporting. As the information provided in the interim financial statements is less comprehensive than that contained in the annual financial statements, these statements should therefore be read in conjunction with the consolidated annual financial statements for 2014. The interim accounts have not been audited. The accounting principles applied in the interim financial statements are the same as those used for the annual financial statements.

2. PRESENTATION OF FINANCIAL STATEMENTS

The presentation in the interim report has been prepared in accordance with the requirements in IAS 34. The schedules comply with the requirements in IAS 1.

3. ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS

In applying the Group's accounting principles to the preparation of the interim financial statements, the management has exercised its judgment and employed estimates and assumptions that affect the figures included in the income statement and balance sheet.

The most important assumptions regarding future events and other significant sources of uncertainty in relation to the estimates, and which may involve a significant risk of material changes to the amounts recognised in future financial periods, are discussed in the annual financial statements for 2014.

In preparing the consolidated financial statements for the fourth quarter, the Group's management has exercised its judgment in relation to the same areas where such judgment has had material significance in relation to the figures included in the Group's income statement and balance sheet, as discussed in the annual financial statements for 2014.

4. SEGMENT REPORTING

The Group reports operating segments in accordance with how the corporate management makes, follows up and evaluates its decisions. The operating segments have been identified on the basis of internal management information that is periodically reviewed by the management and used as a basis for resource allocation and key performance review.

5. UNREALISED EFFECTS PRESENTED IN THE INCOME STATEMENT

The table below shows the lines in the financial statements where the unrealised effects appear.

	First	First quarter 2015					
NOK million	Unrealised	Realised	Total				
UNREALISED EFFECTS REPORTED IN P&L

6. CURRENCY EFFECTS ON INTERNAL LOANS

Net currency effects on internal loans as of the first quarter amounted to NOK 2437 million, of which NOK 1704 million was unrealised and NOK 734 million was realised. The positive effect arose mainly as a result of a stronger NOK against EUR. Statkraft Treasury Centre (STC) provides loans to the Group's companies, mainly in the companies' local currency. STC prepares its accounts in EUR and reports currency effects of lending in the income statement. STC's financial reporting is converted to NOK in the consolidation, and currency effects for the net investment in STC are reported in other comprehensive income.

7. HEDGE ACCOUNTING

Statkraft has used hedge accounting in 2015 that has reduced the volatility in the income statement. A major share of the debt in EUR has been hedged against market rate changes.

Statkraft has set up hedge accounting of parts of the net investments in STC in EUR, as well as parts of the net investments in Statkraft UK Ltd in GBP. The effect of this is that gains of NOK 258 million in 2015 will be recognised in other comprehensive income instead of in the income statement.

8. TRANSACTIONS

On 6 February, Statkraft, along with Södra Skogägarna Ekonomisk Förening (Södra), established the company Silva Green Fuel AS, organised as a joint venture, with the goal of establishing future production of biofuel based on forest raw material at the industrial area housing the former cellulose factory at Tofte in Hurum. Statkraft and Södra own 51% and 49%, respectively, of the new company. The owners have injected NOK 50 million into the company as seed capital.

During the establishment of Silva Green Fuel AS, Statkraft acquired all shares in Statkraft Tofte AS, previously Södra Cell Tofte AS. The acquisition of shares in Statkraft Tofte AS is recognised as purchase of assets. The total cost price for the purchase of shares in Statkraft Tofte AS was NOK 220 million. Net assets in the company totalled NOK 153 million at takeover, in addition to the identified excess value of operating equipment at NOK 67 million.

ON 12 February, Statkraft and RWE Innogy GmbH entered into an agreement to develop and construct the offshore wind farm Triton Knoll, which may have an installed capacity of up to 900 MW. The offshore wind farm is located off the eastern coast of England. Through this agreement, Statkraft secures 50% of Triton Knoll Offshore Wind Ltd, which is organised as a joint venture. Statkraft paid NOK 86 million for its shareholding in Triton Knoll.

9. EVENTS AFTER THE BALANCE SHEET DATE

On 23 April, Statkraft completed its purchase of the listed hydropower company Empresa Eléctrica Pilmaiquén S.A. in Chile. The total cost price for 98.2% of the shares was NOK 1935 million. Net assets as at 31 December 2014 totalled NOK -212 million. The acquisition analysis will be prepared in the second quarter of 2015.
