The project is a 360-degree media company dedicated to the global spa marketplace. Main site of the company is web-based application, which includes huge amount of different features such as comprehensive search engine including GIS, online shopping cart for gift certificate purchase, different loyality programs, deals, promotions, reviews etc.

It has a lot of subprojects of different sizes and directions.

The biggest (a creating from scratch a huge spa-related portal) project includes following features:

- Search for for Spas by different search terms: geographical location, treatments, deals etc

- Integration with Shopping cart (Avetti) for selling gift certificates of different types

- SEO compatibility

- Integration with 3rd party system (Spabooker) for treatments and services reservations

- User management

- Reviews: users can leave reviews and rate spas they have visited while spa owners can reply on them.

- Deals (specific promotions of Spas)

- Content management system for managing spa related content

- I18n

- Etc.
